

## Awning Fabric Replacement Manual

### How to measure awnings:

Awning size is measured from the center of the right arm to the center of the left arm, if you need new fabric replacement, please DO NOT take the measurements of the old fabric or roller tube.

Our fabric will be approximately 10 inch (25.4 cm) shorter than stated length.(e.g awning size 15 ft, finished fabric size should be 14ft 2 inch)

Please Note:

Every manufacturer of these Awning Replacement Fabrics do fold the material for cheaper transport.

Each awning replacement fabric has a shelf life of 7 days starting from the day they are boxed. If the 7 days shelf life has expired it may cause wrinkling and creasing to your fabric, so please plan accordingly.

Since this fabric is painted, there will be a little painting peel off on folding line, but this is normal.

### Awning Fabric Replacement Manual

First Take out the old fabric from the awning.

New awning fabric installation steps:

- 1) Find the plastic stick and get across fabric loop
- 2) Put the fabric into the fabric tube groove.
- 3) Put the fabric into another fabric tube groove, then get the plastic stick across .
- 4) Put the belt on the last tube groove.
